

Team 14: Sprint Two Planning Document

Kathleen Lowe, Ben Herrington, Sofia Hughes, Brayden Reimann, Vidya Madana

Sprint Overview

Throughout the second sprint, our main goals are to finish up Sprint 1 tasks that we deem still relevant and implement one of our largest features: forums. Implementing the Forums feature, along with finishing the implementation of our namesake LitClub feature, will be the primary focuses of this sprint. While we have clear sights set on these tasks, we strive to plan enough time and break these tasks down far enough so that all members can equitably contribute to these behemoth features.

Scrum Master: Kathleen Lowe

Meeting Plan:

- M/W/Th group meetings – 2:30-4:00 p.m.
- Thursday open work time – 4:30 p.m. onwards
- Monday meeting with Project Coordinator – 2:30-3:30 p.m.

Risks and Challenges:

The main challenges that we foresee over the next three weeks are pacing, sticking to our schedule, and managing the commitments we make with regards to project progress. These three challenges are certainly interconnected, yet we have separated them out in order to highlight different points in the next three weeks where we could fall short due to poor resource management. Firstly, we strive to make accurate time estimates and structure the following document in a way that feels feasible to complete. Then, we recognize that we may be at risk of falling behind and not sticking to our Gantt chart. We can combat this by making our Gantt chart more realistic on the front end, planning for days that we know will not work based on our other commitments and coordinating similar tasks to be done in conjunction. Lastly, we will combat our previous time management issues through improving our pacing, encouraging each other to put in the work early and often so that we avoid the last-minute rush that we ran into last sprint.

Current Sprint Details

1. As a user, I would like to be able to see my pronouns on my profile page, and know which fields can and can't be edited.

#	Description	Estimated Time (hours)	Owner
1	Frontend: Add a message to the Create Profile UI that indicates the user's username cannot be modified.	0.5	Sofia
2	Backend: Add pronouns field to User domain object and requests	2	Brayden
3	Frontend (Integration): Connect the Genre Selection UI to PATCH/users{id} endpoint	1	Sofia

Acceptance Criteria

- Given that a user is creating an account, the user should see a label which clearly indicates that their username cannot be modified after account creation.
- Given that a user is on their profile page, they should see their selected preferred pronouns.
- Given that a user is editing their profile, they should be notified that their username cannot be edited.

2. As a reader, I would like to view the information page of a given book.

1	Frontend/Integration: Fetch all relevant book data and populate the existing UI page with that information.	4hr	Ben
2	Frontend/Integration: Fetch and display if the book (as a Library Book object) is on any of the user's book lists, such as currently reading or read.	2hr	Ben
3	Frontend/Integration: Longer summaries are truncated with the option of expanding the summary with a "Read more" Button	3hr	Ben
4	Testing (Frontend): Verify all data displays properly and is formatted to fit properly, regardless of input.	1hr	Ben

Acceptance Criteria:

- Given that a user has selected a book to view its page, the user can see the book's title, author, page count, chapter count, book's summary, genre, and book's cover.
- Given that a user scrolls down on the book page, the user can view if the book is on their book shelf or not, as well as what its current status on their bookshelf is (Has Read, Currently Reading, Want To Read, On Hiatus)
- If a summary is sufficiently long, the summary is truncated, and the user has the option of expanding the summary box to view it in full.

3. As a moderator/team member, I would like to add images of book covers for display

#	Description	Estimated Time (hours)	Owner
1	Backend: Configure Azure Blob Storage to store and retrieve book cover images securely. Generate a public or signed access URL.	4	Ben
2	Backend: Create POST books/{id}/cover endpoint for uploading/updating a book's cover image. Handle image validation (supported formats: JPEG/PNG)	6	Ben
3	Data: Download book covers for existing books in the database, add them to the data directory, and add the image file path for the book cover to the books csv file. Ensure that the book covers align with the supported formats. Only select images < 1 MB in size.	2	Kathleen
4	Backend: Create endpoint for book cover retrieval	1	Ben
5	Backend: Upload covers to database for current sample books	2	Ben
6	Backend (Testing): Use Swagger UI and Azure Storage Emulator to verify correct storage and retrieval	1	Ben
7	Frontend (Integration): Connect the UI to the backend upload endpoint using fetch(), ensuring the image file is converted to a suitable format and	4	Ben

	aspect ratio, and then rendered on the scrolling book list UI and Book pages.		
8	Testing (Frontend): Verify correct upload, preview and cover image refresh behaviors in emulator and test device.	1	Ben

Acceptance Criteria:

- Team members are able to upload Images to the database for storage
- All books currently in database have covers uploaded and viewable
- Given a User goes to their booklists or views a book's page, Users can see the Book's cover, with all cover rendered at the same size.

4. As a user, I would like to be able to upload an image for my profile

#	Description	Estimated Time (hours)	Owner
1	Frontend: Create a profile image upload/edit UI within the "Edit Profile" screen. This should include selecting an image from device storage and previewing it before upload.	3	Sofia
2	Frontend (Integration): Connect the UI to the backend upload endpoint using fetch(), ensuring the image file is converted to a suitable format.	2	Sofia
3	Backend: Create a new endpoint in the Users Controller for uploading/updating a user's profile image. Handle image validation (size < 2 MB, supported formats: JPEG/PNG)	2	Brayden
4	Backend: Configure Azure Blob Storage to store and retrieve profile images securely. Generate a public or signed access URL.	1	Brayden
5	Testing (Backend): Use Swagger and Azure Storage Emulator to manually test API endpoints and database persistence.	1	Brayden
6	Testing (Frontend): Verify correct upload, preview and profile refresh behaviors in emulator and test device.	1	Sofia

7	Documentation: Update README to include instructions for running Azure Storage emulator (for Azure Blob Emulator)	1	Brayden
---	--	---	---------

Acceptance Criteria

- Given that a user is logged in, when they open their edit profile page, then they should see an option to upload or change their profile image.
- Given that the user selects an image from their device, when they confirm upload, then the image should be validated for type (JPEG/PNG) and size (< 2 MB) before being sent to the server.
- Given a valid upload, then the backend should store the image (Azure Blob Storage) and save the image URL in the user's database record.
- Given a successful upload, then the user's profile page should display the new image without requiring manual refresh.
- Given that the user has no uploaded image, then a default placeholder avatar should display.
- Given an error occurs during upload, then the system should provide a clear error message (e.g. "Upload failed. Please try again.").

5. As a user, I would like to be able to make changes to my profile, including changing my bio, pronouns, account info, and preferred pronouns

#	Description	Estimated Time (hours)	Owner
1	Frontend: Edit Profile UI Create a page for the user to edit their profile that pre-populates with their existing information. These fields are editable, and are saved upon pressing the save button.	5	Sofia
2	Frontend: Add a message to the Create Profile UI that indicates the user's username cannot be modified.	0.5	Sofia
3	Frontend: Change email modal Add "Change email" modal/section to Edit Profile UI with fields: Current Email, New Email, Confirm. Ensure proper validation.	1	Sofia
4	Frontend: Change password modal	1	Sofia

	Add “Change password” modal/section to the Edit Profile UI with fields: Current Password, New Password, Confirm. Ensure proper validation.		
5	Frontend (Integration): Connect the Edit Profile UI and modals to PATCH /users/{id} endpoint	2	Sofia
6	Testing (Frontend): Verify correct upload, preview and profile refresh behaviors in emulator and test device.	1	Sofia

Acceptance Criteria

- Given that a user is logged in, when they navigate to the Edit Profile page, then their current bio, pronouns, and account info should be pre-filled and editable.
- Given that the user updates any profile field (bio, pronouns, email, or password) and clicks save, then those changes persist to the database and be reflected immediately on their profile.
- Given that the user enters invalid input (e.g., bio too long, invalid email,, password mismatch), then the UI should block saving and display an appropriate error message.
- Given that an update succeeds, then a success confirmation should appear and the profile page should refresh with updated values.
- Given a failed update (network or server error), then the user should remain on the Edit Profile page and receive an error message without losing their entered data.

6. As a reader, I would like to select books to place on my bookshelf in a specified booklist (such as Currently Reading, Past Reads, and Future Reads)

#	Description	Estimated Time (hours)	Owner
1	Frontend: Finish the UI page for Reading List/Bookshelf with appropriate buttons to implement and add new shelves	4	Kathleen
2	Backend: Implement the following endpoint:: PATCH /libraries/{ownerId}/libraryBooks/status to enable management shelf status management of books in the library	1	Ben

3	Backend: Update GET /libraries/{ownerId}/libraryBooks to support the following query parameters: - status Add the field UpdatedAt to LibraryBook Update the backend to ensure that the ListLibraryBooks returns a list of books sorted by UpdatedAt	3	Ben
3	Frontend (Integration): Integrate Bookshelf with Bookshelf API endpoints: - ListLibraryBooks, GetLibraryBook, etc.	3	Vidya
	Frontend: Make a (new) button/dropdown on the book's book page to add a book to a reading list. This will work via plus sign and dropdown.	1.5	Kathleen
4	Frontend (Integration): Connect button in Book UI page with Library/Bookshelf API endpoints: - AddLibraryBook if the book is not currently in the user's library - DeleteLibraryBook to delete the book from the user's library - EditLibraryBookStatus to modify the book's status <i>If any additional endpoints are needed, reach out to the backend developers and let them know.</i>	3	Vidya

Acceptance Criteria

- Given a user has selected a book and is on that book's page, the user should be able to select to place a book into one of their booklists with a dropdown selection.
- Given a user has selected to add a book to one of their book lists, the user's library will update accordingly
- Given that a user is logged in and owns a library, when they send a valid PATCH request with a new status, then the book's status should update in the database and return the updated record.
- Given that a valid update occurs, when the change is applied, then the updatedAt field should automatically refresh to the current timestamp and the book should appear at the top of subsequent bookshelf queries sorted by updatedAt.
- Given that the update success, then the response should include the full, updated LibraryBook object

- Given a failed update due to a network or server error, then the client should retain the previous local state and display an error message without losing unsaved changes.

7. As a reader, I would like to view forums that correspond to each chapter of the book I am reading

#	Description	Estimated Time (hours)	Owner
1	Frontend: Add Chapters selection to Book info page each chapter linked to its corresponding forum.	4	Vidya
2	Frontend: Create the chapter forum UI	2	Vidya
3	Backend: Create the forums container and endpoints for forum management. Partition the container by bookId.	6	Brayden
4	Frontend (Testing): Verify correct behavior.	1	Vidya
5	Testing (Backend): Use Swagger to manually test API endpoints and database persistence.	1	Brayden

Acceptance Criteria

- Given a user is on the book's info page, then a "Chapters" section appears listing all chapters in order, each with a link or button to its corresponding discussion forum.
- Given the reader selects a chapter's discussion link, then the app renavigates to that chapter's forum screen and displays the correct discussion content.
- Given the backend is queried for chapters, then each chapter in the response includes a valid, unique forumId that corresponds to the chapter.
- Given the forums container and endpoints and configured, then all forum records are correctly stored and retrievable by bookId partition and forumId.
- Given a book has no chapters, then the Chapters section displays an empty state message and no forum links are shown.

8. As a reader, I would like to bookmark chapters and return to my bookmarked chapters in the forum

#	Description	Estimated Time (hours)	Owner
1	Frontend: Create the UI for the forum's checkboxes for each chapter/section. Ensure that the checking off works as anticipated (can only be done in order)	6	Vidya
2	Integration: Add the selection of chapters by the user into the backend stored data as specific to each librarybook and user.	2	Vidya
3	Backend: Create the forums' checkbox container and endpoints for forum management.	4	Brayden
4	Frontend (Testing): Verify correct behavior.	1	Vidya
5	Testing (Backend): Use Swagger to manually test API endpoints and database persistence.	1	Brayden

Acceptance Criteria

- Given that a user opens up a forum for a book that they are reading, they should see a list of chapters with certain chapters (which they've presumably read) checked off.
- Given that a user opens a forum with checked off chapters/sections, the user should be able to see the last checked off chapter.
- Assuming that a user checks off a chapter in the forum, it should be given that all previous chapters/sections have also been checked off.

9. User Story: As a reader, I would like to make comments and subcomments under a chapter forum

#	Description	Estimated Time (hours)	Owner
1.1	Frontend: Create UI components for comments and subcomments. Implement the UI necessary for a user to start a new comment thread.	3	Kathleen
1.2	Frontend: Create UI components for comments	3	Kathleen

	and subcomments. Implement the UI necessary for a user to add subcomments under existing comment threads.		
1.3	Frontend: Create UI components for comments and subcomments. Implement the collapsible parts of the comment UI along with smooth scrolling.	3	Kathleen
2	Backend: Create a dedicated Comments container in Cosmos DB and define the Comment domain object with fields for forumId, parentId, authorId, content, timestamps, and nesting depth. Implement API endpoints for creating, retrieving (paginated), and deleting comments. Partition by forumId and ensure queries efficiently support pagination for large discussion threads.	7	Brayden
3	Frontend (Integration): Integrate the frontend comment components with backend API endpoints for posting new comments, loading threads, and refreshing replies. Ensure optimistic updates for smooth UX and proper error handling for failed submissions.	2.5	Kathleen
4	Frontend (Testing): Verify comment interactions and persistence. Test comment submission, nested reply rendering, and preview behavior. Confirm that refreshing the page shows the latest comments and that newly added comments appear correctly and without duplication.	1	Kathleen
5	Testing (Backend): Use Swagger to manually test all comment management endpoints for correct request/response structures, pagination behavior, and data persistence within Cosmos DB. Verify that nested replies maintain correct parent-child relationships.	2	Brayden

Acceptance Criteria

- Given a reader opens a chapter's forum, then the comments load in the default sort order with top-level comments shown and replies displayed recursively (nested under their parent), with collapse/expand controls preserved per thread.

- Given a reader submits a new top-level comment or replies to any comment, then the comment appears immediately in the correct position (optimistic update) and, on success, is replaced with the server's canonical version.
- Given a reader is writing a comment, then the preview renders the same formatting the forum supports, without saving anything until the comment is submitted.
- Given a thread contains many comments, then scrolling (or "Load more") retrieves the next page via cursor-based pagination without duplicates or gaps, while maintaining a thread hierarchy for newly loaded items.
- Given the page is refreshed or revisited, then newly added comments and replies (by any user) appear according to the default sort order and correct nesting, and previously posted comments are not duplicated even if the prior submit was retired.

10. As a reader, I would like to have the ability to upvote/like comments I agree with

#	Description	Estimated Time (hours)	Owner
1	Frontend: Create a UI symbol to showcase the likes on a comment. This should be present with every comment.	1	Vidya
2	Frontend: Ensure that with each like the count of total likes on a comment increments.	3	Vidya
3	Integration: Ensure that when someone likes a comment, it connects with the backend and updates the count for the comment.	4	Vidya
4	Backend: Implement comment and liking functionality - add support for liking and unliking comments in the backend and update schema to track like count.	4	Brayden
5	Backend: Expose API endpoints for likes, ensure endpoint returns the updated like count and proper status code.	4	Brayden

Acceptance Criteria

- Given that a user sees a comment in a forum thread or review, they should be able to like the comment if they like it.

- Given that a user likes a comment, they should be able to see the like counter increment and show the total number of likes on the comment.
- Given that a user liked a comment, they should be able to unlike the comment by clicking on the thumbs up/heart again.

11. As a reader, I would like to be able to form, name, and provide a description for a book club

#	Description	Estimated Time (hours)	Owner
1	Integration: make basic LitClub information (current read, title, leader, etc.) dynamically loaded on a LitClub's page.	4	Vidya
2	Integration: make a LitClub's bookshelves (past and future) load dynamically on a LitClub's page.	3	Vidya
3	Frontend: Create a button on the LitClub page that allows a user to create a new LitClub.	1	Sofia
4	Frontend: Create a page for a user to input information for a new LitClub: Fields include: Club name, club description That LitClub should be saved and added to the database.	3	Sofia
5	Frontend: After creating the LitClub, the user should be taken to the newly created LitClub.	1	Sofia

Acceptance Criteria

- Given that a user navigates to the LitClub screen, they are able to press a "new LitClub" button.
- Given that the user has pressed the "new LitClub" button, they will be taken to a LitClub settings page and prompted to fill out basic information about their new LitClub.
- Given that a user has input a name for a LitClub and a description, they should be able to click a button to create/publish that LitClub.
- Given that a user has published the LitClub, they will be taken to that new LitClub's main page.

12. As a book club member, I would like to view past books and future books that book clubs have read and plan to read

#	Description	Estimated Time (hours)	Owner
1	Backend: Fetch book club information from back end to display	2	Ben
2	Frontend: Display books as scrollable UI element	1	Kathleen
3	Frontend: Books function as buttons that link to their corresponding books	1	Ben

Acceptance Criteria

- Given that a user is a member of a club, they can view all books from that club's history
- Given that the books display, the user can scroll the books horizontally to view earlier entries
- Given that a user can view a book, they can select a book and be taken to that books page.

13. As a reader, I would like to be able to join a book club and see my book clubs reflected on my profile.

#	Description	Estimated Time (hours)	Owner
1	Integration: When a user is a member of a LitClub, that club should appear on the user's profile page.	1	Sofia
2	Integration: When a user leaves a LitClub, that club should no longer appear on the user's profile page.	1	Sofia
3	Frontend: If a user is a member of a LitClub, their profile picture and username should appear in the member's list.	1	Sofia
4	Frontend/Integration: If a user is a leader/owner of a LitClub, that LitClub should show up under their list of owned LitClubs on the user's profile.	1	Sofia

Acceptance Criteria

- Given that a user is a member of a LitClub, that LitClub should show up on the user's profile page under 'Active LitClubs'.
- Given that a user has left a LitClub, that LitClub should no longer show up under 'Active LitClubs' on the user's profile.
- Given that a user is a member of a LitClub, the user's name should show up on a list of the club's members.
- Given that a user is not a member of a LitClub, the user's name should not show up on a list of the club's members.

14. As a user, I would like to see my status as a member displayed on a book club page, and I would like to be able to join or leave book clubs at will.

#	Description	Estimated Time (hours)	Owner
1	Frontend: When a user navigates to a LitClub, either from the LitClub page or from their own page, it should display whether or not the user is a member of the given LitClub.	1	Sofia
2	Frontend: A button should be added to the top corner of a LitClub page that allows a user to join the LitClub.	1	Sofia
3	Frontend/Integration: If a user is not a member of the LitClub, then the above button should say "Join", and, when pressed, inform the user that they are now a member of the LitClub.	2	Sofia
4	Frontend/Integration: If a user is a member of the LitClub, then the button should say "Leave Club" and, when pressed, pop up with a dialog asking if the user is sure. If the user is sure, it informs them that they are no longer a member of the LitClub.	2	Sofia
5	Frontend/Integration: When a user either joins or leaves the LitClub, that change should be reflected in the database.	2	Kathleen

Acceptance Criteria

- Given that a user is a member of a LitClub, the UI should display an indication on the book club's page that the user is a member.

- Given that a user is not a member of a LitClub, the UI should not display an indication of membership.
- Given that a user is on a LitClub page, there should be a button on the page to allow a user to join or leave a LitClub.
- Given that a user is a member of a LitClub, the join/leave button should display “Leave Club”.
- Given that a user has clicked to leave the club, a box should pop up asking if they are sure; if they cancel the interaction, no changes are made. If they click yes, then they should no longer be a member of the LitClub.
- Given that a user is not a member of a LitClub, the join/leave button should display “Join Club”
- Given that a user clicks “Join Club”, an information box will tell them that they have successfully joined the club.
- Given that a user clicks “Join Club”, they will become a member of that club, and those changes will be reflected both in the database and on the LitClub page via the leave/join button and a UI indicator.

15. As a reader, I would like to add books to my Top 3.

1	Create a button so that when on a book’s page, an option should be available to add or remove a book from the top 3.	2hr	Kathleen
2	Check the user’s top 3; if the book is in the user’s top 3, provide the option to remove it. If not, provide the option to add it to the list.	1hr	Kathleen
3	Check if the user’s top 3 are fully populated. If not, add this book to the top 3.	1hr	Kathleen
4	If the user’s top 3 is fully populated, return that information and do not edit the top 3.	1hr	Kathleen
5	Ensure that editing the top 3 properly updates in the user’s profile.	1hr	Kathleen

Acceptance Criteria

- Given that a user has all of their Top 3 books filled out, they can click on any one of them to go to that book’s book page.
- Given that a user has not filled out all of their top 3, they can click on the “Add to Top Three” option in a book’s page and the book will populate in that user’s top 3.

- Given that a user has filled out all of their top 3 books, if they click on the “Add to Top Three” option on a book’s page, they will receive a notification saying that their top three is full and that they cannot add more books.
- Given that a user has navigated to a book currently in their top three, the button that has previously been “add to top three” will be labelled “Remove from Top Three”.
- Given that a user has navigated to the page of a book currently in their top three, if they press the “Remove from Top Three” button, then the book will disappear from their top three and their profile page will show an empty slot on the top three.

Total Hours Per Person Per Sprint:

#	Team Member	Total Time
1	Kathleen	30
2	Ben	36
3	Sofia	33
4	Brayden	36
5	Vidya	37

Gantt Chart (on next two pages)

#	Task Description	Owner	Start	End	#	Time (hours)	R	C1	Column 4	We	CoA	CoI	CoS	CoL	Column 6	We	Co	CoS	CoL			
1	UI Updates							W	R	F	WKND	M	T	W	R	F	WKND	M	T	W	R	F
1	Backend: Add pronouns field to User domain object and requests	Brayden	10/22/2025	10/23/2025	2																	
1	Frontend: Add a message to the Create Profile UI that indicates the user's username cannot be modified.	Sofia	10/22/2025	10/23/2025	0.5																	
1	Frontend (Integration): Connect the Genre Selection UI to PATCH/users/{id} endpoint	Sofia	10/25/2025	10/26/2025	1																	
2	Fix Book Page Integration																					
2	Frontend/Integration: Fetch all relevant book data and populate the existing UI page with that information.	Ben	10/23/2025	10/23/2025	4																	
2	Frontend/Integration: Fetch and display if the book (as a Library Book object) is on any of the user's book lists, such as currently reading or read.	Ben	10/24/2025	10/24/2025	2																	
2	Frontend/Integration: Longer summaries are truncated with the option of expanding the summary with a "Read more" button	Ben	10/24/2025	10/26/2025	3																	
2	Testing (Frontend): Verify all data displays properly and is formatted to fit properly, regardless of input.	Ben	10/25/2025	10/26/2025	1																	
3	Book Covers																					
3	Backend: Configure Azure Blob Storage to store and retrieve book cover images securely. Generate a public or signed access URL.	Ben	9/30/2025	10/30/2025	4																	
3	Backend: Create POST books/{id}/cover endpoint for uploading/updating a book's cover image. Handle image validation (supported formats: JPEG/PNG)	Ben	10/31/2025	11/2/2025	6																	
3	Backend: Create endpoint for book cover retrieval	Ben	11/3/2025	11/4/2025	1																	
3	Backend (Testing): Use Swagger UI and Azure Storage Emulator to verify correct storage and retrieval	Ben	11/4/2025	11/5/2025	1																	
3	Frontend (Integration): Connect the UI to the backend upload endpoint using fetch(), ensuring the image file is converted to a suitable format and aspect ratio, and then rendered on the scrolling book list UI and Book pages.	Ben	11/5/2025	11/6/2025	4																	
3	Testing (Frontend): Verify correct upload, preview and cover image refresh behaviors in emulator and test device.	Ben	11/6/2025	11/6/2025	1																	
3	Data: Download book covers for existing books in the database, add them to the data directory, and add the image file path for the book cover to the books.csv file.	Kathleen	10/25/2025	10/28/2025	2																	
3	Ensure that the book covers align with the supported formats. Only select images < 1 MB in size.																					
4	Profile Images																					
4	Backend: Create a new endpoint in the Users Controller for uploading/updating a user's profile image. Handle image validation (size < 2 MB, supported formats: JPEG/PNG)	Brayden	10/22/2025	10/23/2025	2																	
4	Backend: Configure Azure Blob Storage to store and retrieve profile images securely. Generate a public or signed access URL.	Brayden	10/23/2025	10/24/2025	1																	
4	Testing (Backend): Use Swagger and Azure Storage Emulator to manually test API endpoints and database persistence.	Brayden	10/24/2025	10/26/2025	1																	
4	Documentation: Update README to include instructions for running Azure Storage emulator (for Azure Blob Emulator)	Brayden	10/25/2025	10/26/2025	1																	
4	Frontend: Create a profile image upload/edit UI within the "Edit Profile" screen. This should include selecting an image from device storage and previewing it before upload.	Sofia	10/27/2025	10/27/2025	3																	
4	Frontend (Integration): Connect the UI to the backend upload endpoint using fetch(), ensuring the image file is converted to a suitable format.	Sofia	10/27/2025	10/28/2025	2																	
4	Testing (Frontend): Verify correct upload, preview and profile refresh behaviors in emulator and test device.	Sofia	10/28/2025	10/28/2025	1																	
5	Editting Profile																					
5	Frontend: Edit Profile UI Implement by modifying the existing Create Profile UI. Populate the fields with existing values, and enable editing. Update the values upon pressing the save button.	Sofia	10/29/2025	10/29/2025	5																	
5	Frontend: Add a message to the Create Profile UI that indicates the user's username cannot be modified.	Sofia	10/29/2025	10/29/2025	0.5																	
5	Frontend: Change email modal Add "Change email" modal/section to Edit Profile UI with fields: Current Email, New Email, Confirm.	Sofia	10/30/2025	10/31/2025	1																	
5	Frontend: Change password modal Add "Change password" modal/section to the Edit Profile UI with fields: Current Password, New Password, Confirm.	Sofia	10/30/2025	10/31/2025	1																	
5	Frontend (Integration): Connect the Edit Profile UI and modals to PATCH /users/{id} endpoint	Sofia	10/30/2025	10/31/2025	2																	
5	Testing (Frontend): Verify correct upload, preview and profile refresh behaviors in emulator and test device.	Sofia	10/30/2025	10/31/2025	1																	
6	Placing Books on 1 of 3 static bookshelves (Current, past, TBR)																					
6	Backend: Implement the following endpoint: PATCH /libraries/{ownerid}/librarybooks/status to enable management shelf status management of books in the library	Ben	10/25/2025	10/26/2025	1																	
6	Backend: Update GET /libraries/{ownerid}/librarybooks to support the following query parameters: status																					
6	Add the field UpdatedAt to LibraryBook	Ben	10/25/2025	10/26/2025	3																	
	Update the backend to ensure that the ListLibraryBooks returns a list of books sorted by UpdatedAt																					
6	Frontend: Finish the UI page for Reading List/Bookshelf with appropriate buttons to implement and add new shelves	Kathleen	10/23/2025	10/23/2025	4																	
6	Frontend: Make a (new) button/dropdown on the book's book page to add a book to a reading list. This will work via plus sign and dropdown.	Kathleen	10/25/2025	10/27/2025	1.5																	
6	Frontend (Integration): Integrate Bookshelf with Bookshelf API endpoints: ListLibraryBooks, GetLibraryBook, etc.	Vidya	10/24/2025	10/26/2025	3																	
	Frontend (Integration): Connect button in Book UI page with Library/Bookshelf API endpoints: AddLibraryBook if the book is not currently in the user's library																					
6	DeleteLibraryBook to delete the book from the user's library	Vidya	10/24/2025	10/26/2025	3																	
	EditLibraryBookStatus to modify the book's status																					
	If any additional endpoints are needed, reach out to the backend developers and let them know.																					
7	View the Forums																					
7	Backend: Create the forums container and endpoints for forum management.	Brayden	10/25/2025	10/26/2025	6																	
	Partition the container by bookid.																					
7	Testing (Backend): Use Swagger to manually test API endpoints and database persistence.	Brayden	10/27/2025	10/28/2025	1																	
7	Frontend: Add Chapters selection to Book info page each chapter linked to its corresponding forum.	Vidya	10/27/2025	10/29/2025	4																	
7	Frontend: Create the chapter forum UI	Vidya	10/27/2025	10/29/2025	2																	
7	Frontend (Testing): Verify correct behavior.	Vidya	10/27/2025	10/29/2025	1

Remaining Backlog:

- ~~1. As a reader, I would like to create a user profile with a username, password, profile image, and a nickname.~~
- ~~2. As a reader, I would like to add a short biography to my profile.~~
- ~~3. As a reader, I would like to select what genres of books I'm interested in seeing recommended to me.~~
4. As a reader, I would like to select books I am currently reading to put on my shelf.
- ~~5. As a reader, I would like to return to books on my shelf to go to their forums.~~
6. As a reader, I would like to bookmark pages/chapters to return to.
7. As a reader, I would like to checkmark chapters to access the forum for that chapter.
- ~~8. As a reader, I would like to modify the status of a given book between four statuses: Want to read, Currently reading, On hiatus, or Finished.~~
9. As a reader, I would like to be able to choose what reading information I share publicly, such as current reads. I should have the option to hide a book from my public bookshelf.
10. As a reader, I would like to be able to follow other readers.
11. As a reader, I would like to view my followers and following users.
12. As a reader, I would like to be able to block other users.
- ~~13. As a reader, I would like to save or "dogear" books I want to eventually read.~~
14. As a reader, I would like to create personalized bookshelves depending on genre or a category of my choosing to compile books into specific reading lists.
15. As a reader, I would like to be able to post blog entries onto my main page without those posts being a part of a given forum.
16. As a reader, I would like to view forums that correspond to each chapter of the book I am reading.
17. As a reader, I would like to share my thoughts by making a comment on a forum.
18. As a reader, I would like to make subcomments under any other comment or subcomment.
19. As a reader, I would like to have the ability to upvote/like comments I agree with.
20. As a reader, I would like to be notified when I receive subcomments from other users.
21. As a reader, I would like to be able to report comments or posts that I find offensive.
22. As a reader, I would like for comments flagged as having spoilers for chapters beyond the scope of the specific forum to be censored or blurred.
23. As a reader, I would like to mark if my chapter review is from a first-time read or a reread.
24. As a reader, I would like to review the book as a whole.
25. As a reader, I would like to mark my review as having or not having spoilers before publishing my review.
26. As a reader, I would like to rate my books out of 5 stars based on several fixed categories to calculate my overall averaged review.

27. As a reader, I would like to flag reviews posted by other users that have spoilers.
28. As a reader, I would like to add tags for my reviews that describe my feelings on the book.
29. As a reader, I would like to sort and read reviews by tags.
30. As a reader, I would like to see the average rating of a book based on others' reviews.
31. As a reader, I would like to sort and read reviews by rating.
32. As a reader, I would like to be able to navigate to someone's profile from the review they posted.
33. As a reader, I would like to be able to join a book club so that I can read books along with others.
34. As a book club leader, I would like to be able to create a book club that readers can join.
35. As a book club leader, I would like to create a list of books for my book club to read.
36. As a book club leader, I would like to select a book for my club to be currently reading.
37. As a book club leader, I would like to create discussion threads specific to my book club.
38. As a book club leader, I would like members to be able to suggest and vote on the next book for the club to read.
39. As a book club leader, I would like to make my book club publicly discoverable and joinable by anyone, or choose to make it private and available only via link.
40. As a book club member, I would like to access discussion pages that my book clubs have set up.
41. As a book club member, I would like to view past books that book clubs have read.
42. As a book club member, I would like to view the future list that a book club plans to read.
43. As a reader, I would like to be able to scroll through available book clubs that are active for a book that I am currently reading.
44. As a reader, I would like to be able to form and name a book club.
45. As a reader, I would like to be able to comment and post within a club discussing a certain book that the group is currently reading.
46. As a reader, I would like to be able to report rude/hurtful comments and users.
47. As a reader, I would like to be able to mark a comment in a book club (including my own), as a spoiler if they have read past the other members of the book club.
- ~~48. As a moderator/team member, I would like to add books and their chapters to the catalogue.~~
49. As a moderator/team member, I would like to add summaries to books for display.
50. As a moderator/team member, I would like to add images of book covers for display.
51. As a moderator/team member, I would like for comments with sensitive content such as hate speech or slurs to be automatically flagged, and kept from being posted.
52. As a moderator/team member, I would like to be notified of reported comments.
53. As a moderator/team member, I would like to be able to delete reported comments.
54. As a moderator/team member, I would like to be able to allow a reported comment to be posted.

- 55. As a moderator/team member, I would like to be able to restrict users from commenting.
- 56. As a moderator/team member, I would like to be able to ban a user from the site.
- 57. As a moderator/team member, I would like to be able to mark a book club as inactive if no one has been active in the club for more than 6 months. (This can be reversed automatically when someone posts/comments in the club group)

Extra Features (If time allows):

- 58. As a book club member, I would like to discover publicly available book clubs from the books I'm currently reading.
- 59. As a reader, I would like to create summaries for each chapter of a given book and the most popular one (determined by likes) becomes the heading
- 60. As a reader, I would like to see books recommended to me based on my previous reading.
- 61. As a reader, I would like to log different reading sessions as I move through a book. In these sessions I would like to mark my beginning and end pages and mark what chapter I've most recently finished.
- 62. As a reader, I would like to mark where I am in a book via page numbers. (ex. Page number ____ of ____ pages, at ____%, with ____s being user input)
- 63. As a reader, I would like to be able to move my reviews/ratings from a different site onto this app with ease when transitioning to this app.
- 64. As a reader, I would like to access forums generalized to specific series or authors

Decided Against Throughout Process

- ~~65. As a reader, I would like to be able to submit summaries for a chapter, with the potential for that summary to be displayed at the top of the chapter's forum.~~
- ~~66. As a reader, I would like to upvote or downvote potential summaries to decide which one gets the forum spotlight.~~
- ~~67. As a reader, I would like to choose which of my reviews, if any, will be displayed/spotlighted on my user profile.~~
- ~~68. As a reader, I would like other readers to be able to view my past book reviews or forum comments from my profile page.~~
- ~~69. As a reader, I would like to direct messages to other users.~~
- ~~70.~~
