

Team 14: Sprint One Planning Document

Kathleen Lowe, Ben Herrington, Sofia Hughes, Brayden Reimann, Vidya Madana

Sprint Overview

This sprint, we hope to get a working app up and running and make progress on the primary pages along with implementing some basic functionality. Our basic framework consists of React Native and Azure for frontend and backend.

We plan to get the beginning stages of the app (determined by our navigation flowchart) completed. This includes profile set up and basic UI design and app set up. We hope to make progress on the home page and other primary page designs, including implementing the library and individualized bookshelves. Additionally, we hope to set up a working demo database of books for the user to add to their shelves and a database for user information.

Scrum Master: Kathleen Lowe

Meeting Plan:

- Meeting with Project Coordinator – 2:30-3:30 p.m. Mondays, LWSN 1190
- Monday SCRUM meeting – 3:30-4:00 p.m.
- Wednesday Team Meeting and SCRUM meeting – 2:30-4:00 p.m., HSSE 145
- Thursday SCRUM meeting and open work time – 4:30 p.m. onwards
- Friday meeting (optional/if necessary) – 2:30-6:00 p.m. (maximum)

Risks and Challenges:

A particularly challenging aspect of our team's sprint will be the time it takes for us to get familiar with React Native and Azure. Most of our team has little experience with app development, and we want to make sure we have a deep understanding of the tools we are using before making large-scale progress. As a result, we anticipate the amount of user stories we complete this sprint may be less than next sprint's total.

We also anticipate struggling with understanding the timing and work hours being spent on each user story/task due to this being our first sprint and our team being unfamiliar with the estimation of hours spent on each task.

Current Sprint Details

User Story #1 As a reader, I would like to create a user profile with a username, password, profile image, and a nickname, and add a short biography to my profile.

#	Description	Estimated Time (hours)	Owner
1	Create a separate page for account setup.	.5 hr	Sofia
2	Format the page with fields for the name, nickname, pronouns, and biography	1.5 hr	Sofia
3	Create container for the profile picture	1 hr	Sofia
4	Allow a user to add their nickname, pronouns, and bio.	1 hr	Sofia
6	Connect the user object to the backend so the user is saved in the database	2 hr	Sofia
7	Allow user to mark profile as private or public, and update information in database	2hr	Ben
8	Create an ASP.NET Core Web API and new database in Cosmos DB (via the Cosmos DB emulator), connect the two	4hr	Brayden
9	Create Users Container (Cosmos DB) and Users Controller (Web API) with endpoints for profile management	2hr	Brayden
11	Write API specifications document for Users Controller (only include completed endpoints)	1hr	Brayden
12	Configure connection strings and update README with instructions for running API and database (for testing purposes)	4hr	Brayden
13	Test to make sure UI and backend both work synchronously for profile set up and information saves	1.5hr	Kathleen

Acceptance Criteria

- Given that the user can successfully create an account, they should be directed to a working profile page to input the necessary and optional parameters for their profile.
- Given that the profile page is correctly implemented, the user should be able to mark their profile as private or public.
- Given the profile page field inputs are working, they should have valid input options according to necessity (i.e. dropdown for pronouns, short input field for name, long input field for bio, etc).

User Story #2 As a reader, I would like to select what genres of books I'm interested in seeing recommended to me.

#	Description	Estimated Time (hours)	Owner
1	Create a UI page with different book genres labelled as tags, allowing users to select their top 5 favorite genres.	3hr	Vidya
2	Update Users Controller API endpoints to enable genre selection/modification.	2hr	Brayden
3	Write unit tests for endpoints.	1.5hr	Brayden

Acceptance Criteria

- Given a successful initial account set up, the user should be taken to a page with various genres where the user can select their top five genres to receive recommendations on and show on their profile.
- Given a list of selected genres, the user should be able to click a button which brings them to a page to edit/modify their selected genre preferences.
- Given the list of genres, the top five genres should be displayed on a user's profile.

User Story #3 As a moderator/team member, I would like to add books and their chapters to the database.

#	Description	Estimated Time (hours)	Owner
---	-------------	------------------------	-------

1	Configure CSV files that correspond to books in database	3hr	Ben
2	Create a parser for the CSV file which converts the data to objects and upserts them into the database	2hr	Ben
3	Populate CSV file with sample data.	3hr	Kathleen
4	Write unit tests for CSV parser	1.5hr	Ben

Acceptance Criteria

- Given that the book information exists, team members should be able to add books and corresponding information to the CSV file by means of predefined format.
- Given the working CSV file with accurate data, team members should be able to run a program which parses the file and inserts the book data into a database.
- Given the non-empty database, the system should prevent accidental corruption of the database by validating the inputted data. Data is not repeated in the database, nor overwritten without moderator verification..

User Story #4 As a reader, I would like to view and interact with my home bookshelf.

#	Description	Estimated Time (hours)	Owner
1	Create a UI feature for the Bookshelf. This should be a compilation of individual book lists that can individually be navigated.	4hr	Vidya
2	Import LitClub color theme as a CSS style guide file	3hr	Sofia
3	Create Books Controller and API endpoints for retrieving Book data	4hr	Brayden
4	Create Bookshelf Controller and API endpoints for bookshelf management	4hr	Ben
7	Write API specifications document for Books Controller (only include completed endpoints)	1hr	Ben
8	Write API specifications document for Bookshelf Controller (only include completed endpoints)	1hr	Brayden

9	Perform manual testing	1.5hr	Kathleen
---	------------------------	-------	----------

Acceptance Criteria

- Given that the home page/bookshelf displays the user's books, the user should be able to scroll through each individual book list.
- Given a working and navigable book list, a user should be able to add and remove books from a list.
- Given a book list, the user should be able to scroll through their whole bookshelf to each individual book list.

User Story #5 As a reader, I would like to view the information page of a given book.

#	Description	Estimated Time (hours)	Owner
1	Create UI page for a book's info page. This includes: book title, author name, chapter count, publisher + publish date	3hr	Vidya
2	Fetch all relevant book data and populate the page with that information.	3hr	Ben
3	Fetch and display if the book is on any of the user's book lists, such as currently reading or read.	2hr	Ben

Acceptance Criteria

- Given that the book is accurately populated in the database, the user should be able to search for a book and view the book page on the app.
- Given that the book page is navigable, the user should be able to add that book to a specified reading list of their choice.
- Given that a user already has a book in a list, they should be able to see on the book page that they have it in XXX list.

User Story #6 As a reader, I would like to modify the status of a given book between four statuses: Want to read, Currently reading, On hiatus, or Finished.

#	Description	Estimated Time (hours)	Owner
1	Create a button on a book's information page that allows a user to change the status of a book	3hr	Sofia

	between either of the four statuses.		
2	Test that the book's status updates correctly both on the button and in the user's book lists.	1hr	Sofia

Acceptance Criteria

- Given a book's information page, the user should be able to edit the status of a book in their library via a dropdown menu.
- Given a change in the book's status, the user should see this change reflected on the book's information page.
- Given a change in the book's status, the book should appear in the book list corresponding to the new status.

User Story #7 As a reader, I would like to be able to join a book club so that I can read books along with others.

1	Create LitClub container in Cosmos DB and LitClubs Controller in API	2hr	Ben
2	Add API endpoints to LitClubs Controller for LitClub management	4hr	Ben
3	Write integration tests for LitClubs Controller endpoints	1.5hr	Ben
4	Write API specifications document for LitClubs Controller (only include completed endpoints)	1hr	Ben
5	Create Membership Controller and API endpoints for management of user LitClub membership (membership data is stored in Users container)	4hr	Brayden
7	Write API specifications document for Membership Controller.	1hr	Brayden
8	Create a UI page for the Bookclub. This should include basic club information.	4hr	Kathleen
9	Add a button for "Send invite" which enables an admin to invite a user to the LitClub.	2hr	Brayden
10	Create a notification/join system that allows the receiver to view and join the LitClub.	4hr	Brayden

11	Allow users to add a book to a LitClub's To Be Read list from the book's page.	2.5hr	Kathleen
12	Update the UI to show the currently reading book.	2hr	Kathleen
13	Update the UI to show the future book list and past books list.	2hr	Kathleen
14	Add API Endpoints to allow LitClub creators to manage the future and past book lists.	2hr	Ben
15	Write API specifications document for editing LitClub book lists.	1hr	Ben

Acceptance Criteria

- Given that a LitClub exists, a user should be able to view the club's basic information on the Bookclub UI page.
- Given that a user has created a LitClub, they should be able to send an invite to other users.
- Given that a user has an invite, they should receive a notification with the option to join the LitClub.
- Given that a user accepts an invite, their membership should be added to the Users container and reflected in the Membership Controller.
- Given that a user has joined a LitClub, the UI should update to display them as a member of that club.
- Given that a user has added books for a LitClub to read, then these books should appear in a list on the LitClub's page.
- Given that a LitClub has completed books, a user should be able to see a list of these completed books.

User Story #8 As a user, I would like to navigate between the homepage, user profile, and book clubs.

#	Description	Estimated Time (hours)	Owner
1	Set up a UI header for the app. This should remain consistent among all three primary pages, and have interactive buttons	1hr	Vidya

2	Create a working search bar for the header (which takes in input). Output for the search bar is not yet implemented	2hr	Vidya
3	Given a list of selected genres, the user should be able to edit/modify their selected genre preferences.	2hr	Sofia
4	Set up the UI for the homepage, ensuring that all of the key components, which match our mockups, exist in the homepage.	3hr	Vidya
5	Ensure that each reading list works and is interactive. This also should match user data in the database.	2hr	Vidya
6	Set up a UI page for book clubs. There are three main sections: active clubs, past/archived clubs, and moderating clubs (clubs of which you are the owner)	3hr	Sofia
7	Set up the UI for active clubs and retired clubs. This should include a complete set of clubs that you are a part of and not a moderator of. You should have the option, for each club, to leave the club or “mute” the club, meaning you won’t receive notifications.	2hr	Sofia
8	Set up the UI for moderating clubs. This is for a club for which you are the owner. Users should be able to transfer ownership, delete/retire the club, change the book club information, etc.	2hr	Sofia
9	Allow users to create new clubs in the clubs page. This should be able to add a name for the club and pick a book for the club. The actual book “club” will not yet be created in this sprint	1hr	Sofia
10	Set up a UI page for the user profile. This should display the user’s profile and all the information which they wish to keep public. Typical information includes: username, name, pronouns, genres choices, top three books.	4hr	Kathleen
11	Set up a link to the settings page, which can be navigated to via the profile page. This settings button should be found in a corner of the page.	1hr	Kathleen

12	Set up a data analytics visualization of the user's reading history, found in their profile page. This will be artificial data temporarily, until user reading data is logged. Include a javascript and typescript page for data visualization	3hr	Kathleen
13	Set up a UI settings page that allows users to <i>edit</i> their profile information, log out, and delete their account. Update accordingly in the database.	3hr	Vidya

Acceptance Criteria

- Given a user is logged in, the user should be able to navigate to each of the three primary app pages from each of the other pages.
- Given that the user is on the book club page, the user should be able to scroll through and click on their current book clubs that they are a part of.
- Given that a user is on the book club page, the user should be able to see book clubs that they are moderators for vs. clubs they are members in.
- Given that a user is on the book club page, the user should be able to see a separate list for inactive/archived book clubs.
- Given that the user is on the account profile page, the user should be able to see their user profile and information.
- Given that a user is on the account profile page, there should also be a settings button that will lead them to account settings and information.
- Given that the user is on the settings pages, the user should be able to edit their profile and manage account settings.

User Story #9 As a reader, I would like to scroll through a list of books recommended to me to add books to my bookshelf and book list.

#	Description	Estimated Time (hours)	Owner
1	Make the logo for the app (LitClub) in the top left corner a UI button that leads to an app page with book recommendations for the user.	1hr	Vidya
2	Design the book collections page and ensure each book has a button so the user can click on the book and be taken to an information page on the book.	4hr	Vidya
3	Make sure the book collections page is split up into an organized and digestible format, allowing users	2hr	Vidya

	to scroll through the page via genre.		
4	Ensure the database entries for all of these books are complete and working.	1hr	Kathleen
5	Test to ensure this works with unit tests and ensuring that each book can be added to the user's shelf.	1.5hr	Kathleen

Acceptance Criteria

- Given that the user clicks on the LitClub logo, the user should be taken to an app page that has various book recommendations, populated from the demo database.
- The page should be split up by genres and curate the top five genres at the top of the list.
- Given that the user clicks on a book, they should be taken to an information page for the book, where they can then choose to add it to a book list if they wish.

User Story #10 As a reader, I would like to be able to choose what reading information I share publicly, such as current reads. I should have the option to hide a book from my public bookshelf.

#	Description	Estimated Time (hours)	Owner
1	Create UI Button and restrictions for users to be able mark books as private in their booklists and bookshelf. Restricted (marked private) books should not display for other users.	3hr	Sofia
2	Update the User class to enable marking specific fields private.	2hr	Kathleen
3	Test to ensure this works by checking a profile using a different user account.	1hr	Kathleen

Acceptance Criteria

- Given that users have a book in their reading list, they can toggle books between being privately and publicly viewable.
- Given that a book is set to private for user A, a different user B looking at user A's profile should not be able to see that that book is in their profile.
- Given that a book is private or public, the UI should correspond and have a close or open eye to indicate whether the book is private or public.

User Story #11 As a reader, I would like to add books to my Top 3.

#	Description	Estimated Time (hours)	Owner
1	Create a button so that when on a book's page, an option should be available to add or remove a book from the top 3.	2hr	Vidya
2	Check the user's top 3; if the book is in the user's top 3, provide the option to remove it. If not, provide the option to add it to the list.	1hr	Sofia
3	Check if the user's top 3 are fully populated. If not, add this book to the top 3.	1hr	Sofia
4	If the user's top 3 is fully populated, return that information and do not edit the top 3.	1hr	Sofia
5	Ensure that editing the top 3 properly updates in the user's profile.	1hr	Sofia

Acceptance Criteria

- Given that a user has filled their top 3, when they attempt to add a book to their top three, then the book will not be added and the user will be informed of this.
- Given that a user has not filled their top 3, when they attempt to add a book, then the book will be added to their top 3.
- Given that a user has filled their top 3, when they view their profile, they will be able to properly see their top 3 books.

Total Hours Per Person Per Sprint:

#	Team Member	Total Time
1	Kathleen	30
2	Ben	30
3	Sofia	30
4	Brayden	30
5	Vidya	30

[Live Gantt Chart Link](#)

[illegible]

- ~~5. As a reader, I would like to select books I am currently reading to put on my shelf.~~
6. As a reader, I would like to return to books on my shelf to go to their forums.
7. As a reader, I would like to bookmark pages/chapters to return to.
8. As a reader, I would like to checkmark chapters to access the forum for that chapter.
- ~~9. As a reader, I would like to scroll through a list of books recommended to me to add books to my bookshelf and book list~~
- ~~10. As a reader, I would like to modify the status of a given book between four statuses: Want to read, Currently reading, On hiatus, or Finished.~~
- ~~11. As a reader, I would like to be able to choose what reading information I share publicly, such as current reads. I should have the option to hide a book from my public bookshelf.~~
12. As a reader, I would like to be able to follow other readers.
13. As a reader, I would like to view my followers and following users.
14. As a reader, I would like to direct messages to other users.
15. As a reader, I would like to be able to block other users.
- ~~16. As a reader, I would like to save or "dogear" books I want to eventually read.~~
17. As a reader, I would like to create personalized bookshelves depending on genre or a category of my choosing to compile books into specific reading lists.
18. As a reader, I would like to be able to post blog entries onto my main page without those posts being a part of a given forum.
19. As a reader, I would like other readers to be able to view my past book reviews or forum comments from my profile page.
20. As a reader, I would like to view forums that correspond to each chapter of the book I am reading.
21. As a reader, I would like to share my thoughts by making a comment on a forum.
22. As a reader, I would like to make subcomments under any other comment or subcomment.
23. As a reader, I would like to have the ability to upvote/like comments I agree with.
24. As a reader, I would like to be notified when I receive subcomments from other users.
25. As a reader, I would like to be able to report comments or posts that I find offensive.
26. As a reader, I would like for comments flagged as having spoilers for chapters beyond the scope of the specific forum to be censored or blurred.
27. As a reader, I would like to mark if my chapter review is from a first-time read or a reread.
28. As a reader, I would like to review the book as a whole.
29. As a reader, I would like to mark my review as having or not having spoilers before publishing my review.
30. As a reader, I would like to rate my books out of 5 stars based on several fixed categories to calculate my overall averaged review.
31. As a reader, I would like to flag reviews posted by other users that have spoilers.

32. As a reader, I would like to add tags for my reviews that describe my feelings on the book.
33. As a reader, I would like to sort and read reviews by tags.
34. As a reader, I would like to see the average rating of a book based on others' reviews.
35. As a reader, I would like to sort and read reviews by rating/
36. As a reader, I would like to choose which of my reviews, if any, will be displayed/spotlighted on my user profile.
37. As a reader, I would like to be able to navigate to someone's profile from the review they posted.
38. As a reader, I would like to be able to submit summaries for a chapter, with the potential for that summary to be displayed at the top of the chapter's forum.
39. As a reader, I would like to upvote or downvote potential summaries to decide which one gets the forum spotlight.
- ~~40. As a book club leader, I would like to be able to create a book club that readers can join.~~
- ~~41. As a book club leader, I would like to create a list of books for my book club to read.~~
- ~~42. As a book club leader, I would like to select a book for my club to be currently reading.~~
43. As a book club leader, I would like to create discussion threads specific to my book club.
44. As a book club leader, I would like members to be able to suggest and vote on the next book for the club to read.
- ~~45. As a book club leader, I would like to make my book club publicly discoverable and joinable by anyone, or choose to make it private and available only via link.~~
46. As a book club member, I would like to access discussion pages that my book clubs have set up.
- ~~47. As a book club member, I would like to view past books that book clubs have read.~~
- ~~48. As a book club member, I would like to view the future list that a book club plans to read.~~
49. As a reader, I would like to be able to scroll through available book clubs that are active for a book that I am currently reading.
- ~~50. As a reader, I would like to be able to form and name a book club.~~
51. As a reader, I would like to be able to comment and post within a club discussing a certain book that the group is currently reading.
52. As a reader, I would like to be able to report rude/hurtful comments and users.
53. As a reader, I would like to be able to mark a comment in a book club (including my own), as a spoiler if they have read past the other members of the book club.
- ~~54. As a moderator/team member, I would like to add books and their chapters to the catalogue.~~
55. As a moderator/team member, I would like to add summaries to books for display.
56. As a moderator/team member, I would like to add images of book covers for display.
57. As a moderator/team member, I would like for comments with sensitive content such as hate speech or slurs to be automatically flagged, and kept from being posted.
58. As a moderator/team member, I would like to be notified of reported comments.

- 59. As a moderator/team member, I would like to be able to delete reported comments.
- 60. As a moderator/team member, I would like to be able to allow a reported comment to be posted.
- 61. As a moderator/team member, I would like to be able to restrict users from commenting.
- 62. As a moderator/team member, I would like to be able to ban a user from the site.
- 63. As a moderator/team member, I would like to be able to mark a book club as inactive if no one has been active in the club for more than 6 months. (This can be reversed automatically when someone posts/comments in the club group)

Extra Features (If time allows):

- 64. As a book club member, I would like to discover publicly available book clubs from the books I'm currently reading.
- 65. As a reader, I would like to create summaries for each chapter of a given book and the most popular one (determined by likes) becomes the heading
- 66. As a reader, I would like to see books recommended to me based on my previous reading.
- 67. As a reader, I would like to log different reading sessions as I move through a book. In these sessions I would like to mark my beginning and end pages and mark what chapter I've most recently finished.
- 68. As a reader, I would like to mark where I am in a book via page numbers. (ex. Page number ____ of ____ pages, at ____%, with ____s being user input)
- 69. As a reader, I would like to be able to move my reviews/ratings from a different site onto this app with ease when transitioning to this app.
- 70. As a reader, I would like to access forums generalized to specific series or authors
